Sample Reflection in Special Education: An Example

Below is an excerpt from a hypothetical sample reflection paper to illustrate key elements:

> During my recent classroom experience with students with autism spectrum disorder (ASD), I implemented a visual schedule to promote independence. Initially, I noticed that students responded positively, following the schedule with minimal prompts. However, I encountered challenges when some students became overwhelmed during transitions. Reflecting on this, I realized that incorporating more sensory breaks could have eased transitions. According to the principles of sensory integration therapy, providing sensory input can help students regulate their emotions. Moving forward, I plan to integrate regular sensory activities and involve students in creating their visual cues, fostering greater ownership and comfort.
