2. Population Distribution Patterns

Populations are unevenly spread across regions due to factors like:

- Climate conditions
- Availability of resources
- Topography
- Socioeconomic opportunities

Common distribution patterns include:

- Clumped Distribution: Individuals are grouped around resources (e.g., cities, water sources).
- Uniform Distribution: Even spacing due to territorial behavior.
- Random Distribution: No specific pattern, often in resource-rich or unpredictable environments.

Workbook Exercises: Be prepared to analyze maps and data showing these patterns, and explain the reasons behind them.

3. Factors Affecting Population Growth

Population growth is influenced by several factors, grouped into:

- Birth Rate (Natality): The number of births per 1,000 individuals per year.
